

OCT 07 2002

Post Commander  
Florida High Way Patrol  
2402 US 90 West  
Lake City, Florida

Oct. 2, 2002

Dear Sir,

I wish to share an experience with you and hope that this letter of gratitude finds its way to Trooper Nicholas Causey, badge Number 1050. On Friday September 20, 2002, while en-route to Orlando via inner state 75, my wife hit a steel object in the left lane of the highway causing a blow out of the right front tire and forcing her to stop in the left side emergency lane. The object was again hit by a following motorist causing it to be air borne and ending up against the wind shield of a third motorist, no injury, but the young lady was covered in glass from head to toe. Now we have three vehicles in the left emergency lane with south bound traffic passing at the speed of light. Emergency help was contacted via "On Star" and "911" ; now comes Patrolman Causey who assisted the young lady with medical needs, then managed to move two distressed autos to the safety of the right shoulder. This young man assisted the road service gentleman in changing our tire, further he located a replacement tire, and gave specific directions on where the dealer was located. I felt that his actions were above the norm and he expressed a sincere interest in our safety and getting us on our way. Please express our sincere "thank you" to patrolman Causey and a pat on the back to the rest of the guys.

Yours sincerely,  
Ron & Betty DiGiacomo
