KIRKMAN BUILDING SPECIAL PROJECTS AND IMPROVEMENTS Amount: \$415,000

This issue requests \$415,000 in funding from the Highway Safety Operating Trust Fund for fiscal year 2010-11, and for subsequent years, for general repairs to the Neil Kirkman Building in Tallahassee. The Kirkman Building was constructed in 1956, with wing additions being made in subsequent years. The building is comprised of 380,836 square feet.

Items included in this request are two critical life safety repair issues. The first item is plumbing backflow prevention based on a May 2008 State Fire Marshal's report of deficiencies. Plumbing backflow prevention is necessary to prevent backflow of non-potable water into the building system. The second item is for replacement of an inadequate fire alarm system which currently requires manual manipulation. Replacement of this fire alarm system is critical for safety of employees and visitors.

The requested funding issue is itemized as follows:

Description	FY 2010-11	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15
Replace Fire Alarm System	\$ 355,000	\$ 0	\$ 0	\$ 0	\$ 0

NEW FLORIDA HIGHWAY PATROL PINELLAS COUNTY STATION

This issue requests \$2,376,000 in funding from the Highway Safety Operating Trust Fund to build a new Florida Highway Patrol (FHP) Station in Pinellas County. Funds were appropriated in 2007-08 but this project was put on hold until 2011-12. Part of the appropriated funds were used to begin the design and development process, while \$2,000,000 + reverted to the Trust Fund. The Department has entered into an Agreement in Principal to obtain the property and the Florida Department of Transportation is in the process of transferring the property to the Department of Environmental Protection (DEP). DEP in turn will lease the property to the Department for 50 years.

The current Troop C station was constructed in 1960; renovated in 1966 and had an addition in 1981. The structure (over 40 years old) does not have sufficient space or the new technology to effectively and efficiently run. There is no secure holding area for suspects, no conference rooms, and no interrogation/observation room. The lighting is inadequate with no benefit of current technology. Floors, walls and ceilings are in poor condition. The air conditioning ducts need to be replaced and the building contains asbestos. The drainage around the building is insufficient and contributes to mold issues. The parking lot needs repairs and repaving in order to avoid trip and fall hazards. Restrooms are in need of repair.

The requested funding is itemized as follows:

Description	FY 2010-11	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15

AGENCY NARRATIVE:

2010-2011 BUDGET YEAR NARRATIVE: FHP NEW BRADENTON/VENICE IT COMPONENT? NO  
 Long-Range Program Plan Approved Activity: Enforcement of Traffic Laws

NEW FLORIDA HIGHWAY PATROL BRADENTON/VENICE STATION

This issue requests funding from the Highway Safety Operating Trust Fund in fiscal year 2013-14 for the replacement of Troop F's Bradenton and Venice facilities with a new combined facility, at a central location.

The Bradenton facility was built in 1980 with 5,770 square feet of office space and a communications building with 1,600 square feet. Both buildings are in need of major repair. There is no secure holding area for suspects, there is no conference room, no space for conducting sobriety testing, no group meeting space, no interrogation/observation room, and there are many items (evidence and property) stored in an adjacent building which should be secured. Both buildings do not provide adequate space for assigned personnel, nor adequate storage space. Some files are not kept in close proximity. The lighting is inadequate, and the HVAC systems provide no technology to conserve energy and support the Department's Green Initiative. Floors, walls, ceiling, and security for this facility must also be addressed.

The Venice station (3,489 square feet), built in 1976, with an adjacent storage building (275 square feet) has some of the same problems. In addition, restrooms need to be retrofitted to meet the guidelines of the Americans with Disabilities Act.

This issue requests \$4,080,000 to build a 10,850 square foot combined facility to accommodate the Bradenton and Venice stations in a central location. The new facility will provide adequate space, safety and convenience for personnel.

The requested funding is itemized as follows:

NEW FLORIDA HIGHWAY PATROL TALLAHASSEE STATION

This issue requests funding in fiscal year 2012-13 from the Highway Safety Operating Trust Fund for the construction of a new two-story facility, on existing property to replace the current Troop H facility. The new facility will house Troop H and an existing Regional Communication Center, which is currently housed in a leased facility. The current headquarters structure (3,068 square feet) and adjacent building (1,600 square feet) are in need of major repair, and the desired replacement is the only reasonable alternative.

The Tallahassee facility was built in 1966 with 3,188 square feet and an adjacent building has 1,500 square feet. These buildings do not have sufficient space or provide the technology to conserve energy and meet the Department's Green Initiative. The adjacent building was originally a communications building but is now being used as office space. There is no secure holding area for suspects, no conference room, no space for conducting sobriety testing, no interrogation/observation room, and there are items (evidence and property) stored in adjacent buildings that should be in a secured facility. The lighting is inadequate; floors, walls, ceilings, air conditioning, and security are all in poor condition with little or no benefit of current technology to conserve energy.

The Tallahassee Regional Communications Center (TRCC) currently leases space in the Carlton Building. It has been determined that the Department of Revenue will be moving to another location in the Southwood Office Complex in the near future, leaving the TRCC as the only occupant. The ultimate disposition of the Carlton Building is not presently known. The Florida Highway Patrol seeks to relocate the TRCC to the new facility at troop headquarters on Mahan Drive. The new

NEW FLORIDA HIGHWAY PATROL FRUITLAND PARK/LAKE COUNTY STATION

This issue requests \$2,376,000 in funding from the Highway Safety Operating Trust Fund for fiscal year 2014-15 to construct a Florida Highway Patrol (FHP) station in Fruitland Park. The Fruitland Park FHP station in Lake County was built in the 1960's and has not been renovated since. Major problems are being experienced with all aspects of the building, including electrical, plumbing, fixtures, air conditioning, generator and fencing. Floor space at this location is inadequate for the number of personnel. A Division of Motor Vehicles employee is currently co-located with FHP and has a desk in the open Trooper Room, providing no privacy. The current evidence room is over capacity and evidence must be stored at the Orlando station. The location for the new station is to be determined, but is expected to result in minimal or no cost to the State for the property. The current location is privately owned and is leased by the State at a minimal cost.

AGENCY NARRATIVE:

2010-2011 BUDGET YEAR NARRATIVE: MINOR REPAIRS/IMPROV-STATE IT COMPONENT? NO  
 Long-Range Program Plan Approved Activity: Issue Driver Licenses and Identification Cards

DIVISION OF DRIVER LICENSES FACILITY MAINTENANCE & REPAIRS Amount: \$483,000

This issue requests for Fiscal Year 2010-11, \$483,000 from the Highway Safety Operating Trust Fund for maintenance and repairs to state facilities statewide as part of our five-year plan. Funding for subsequent years is also requested from the Highway Safety Operating Trust Fund as reflected below.

Roof replacement is a critical issue due to the current age and condition of the roofs and to prevent water intrusion damage. In addition, funding is requested for mold and mildew remediation, duct cleaning, and HVAC repair and replacement, security fencing, flooring, paving, and ADA restrooms, and miscellaneous maintenance/repairs. The mold and mildew remediation is necessary due to water intrusion from excessive rainfall, past hurricanes and tropical storms. These heating/air conditioning issues are critical because of the current age/condition of the equipment and the emergency maintenance costs necessary for continuing use.

The requested funding is itemized as follows:

Description	FY 2010-11	FY 2011-12	FY 2012-13	FY 2013-14	FY 2014-15
