IMPAIRED DRIVING ANNUAL REPORT

January 31, 2022

EXECUTIVE SUMMARY

Note: For the purposes of this report, the Florida Department of Highway Safety and Motor Vehicles will be referred to as the department.

Pursuant to <u>section 381.989</u>, Florida Statutes, the Florida Department of Highway Safety and Motor Vehicles maintains statewide impaired driving education campaigns to raise awareness and prevent marijuana-related and cannabis-related impaired driving.

For the purposes of this report, the department does not differentiate between marijuana and cannabis, and will refer to them both as marijuana. The State's definitions can be found in Florida Statutes <u>section 381.986(1)(f)</u> for marijuana, and <u>section 893.02(3)</u> for cannabis.

Instead, this report focuses on the impairment caused by use of these, and other impairing substances, that result in traffic crashes, injuries and fatalities.

Beginning in 2017 and annually thereafter, the statute required the department to capture data on the number of marijuana-related citations, crashes and arrests, and report this data on January 31 of each year to the Governor, the President of the Senate and the Speaker of the House of Representatives.

To assist in capturing the data on marijuana-related and other drug impairment crashes, the department implemented a supplement to Florida's Traffic Crash report. The supplement has been adopted by all law enforcement agencies in the state and captures seven drug types based on the National Highway Traffic Safety Administration's recommendations for drug impairment. This supplement is required to be provided with all crash reports indicating a person was impaired by drugs at the time of the crash.

The department trains a number of Florida Highway Patrol Troopers as Drug Recognition Experts, also known as D R E's. D R E's are highly-trained law enforcement officers with expert knowledge in an extensive range of driver impairments and their associated signs and symptoms. D R E's are dispatched to assist investigations and obtain convictions in cases involving impaired driving.

IMPAIRED DRIVING CAMPAIGNS

The department continues to promote traffic safety and prioritizes the education of Floridians on the dangers of impaired driving through ongoing public awareness campaigns.

In March 2021, the department launched the *NO EXCUSES. NEVER DRIVE IMPAIRED* campaign, focusing on educating high schoolers and college-aged students on the seriousness and consequences of driving while impaired. The *NO EXCUSES. NEVER DRIVE IMPAIRED* campaign used a variety of marketing tactics to squash the excuses and rationalizations that individuals may have to justify driving impaired – such as "It's not like I've been drinking," "I'm not driving that far," "My doctor prescribed this to me," "But I have my medical marijuana card," and "I

don't feel that different." In addition, the campaign targeted popular Spring Break destinations and where the most DUI citations and crashes occurred in Florida, using strategically placed paid media. This campaign garnered over 10 million impressions through paid media ads on Google, YouTube, Facebook, Instagram, Snapchat, Spotify, Pandora, and Gas Station TV. Additionally, the department developed messaging and graphics and provided marketing materials to Florida Highway Patrol Public Affairs Officers, public safety partners, and other stakeholders throughout the state.

In November and December 2021, the department launched the *Safety is Always in Season* campaign, a two-month Safe Holiday Travel campaign. The campaign encompassed many topics, but the impaired-driving prevention and educational messaging was the focus. Based on the *Safety is Always in Season* message, a variety of marketing tactics were deployed to remind Florida drivers to stay safe on and around Florida's roads while they travel for the Thanksgiving, Christmas and New Year holidays – by never driving impaired. This campaign garnered nearly 20 million impressions through paid media ads on social media and online, internet radio, and Gas Station TV.

Throughout 2021, the department launched two major, statewide public awareness campaigns focused on impaired-driving prevention and education and also incorporated these life-saving messages throughout the entire year. The department will continue to educate Floridians on the dangers of impaired driving in 2022.

FLORIDA HIGHWAY PATROL DRUG RECOGNITION EXPERT PROGRAM

The Florida Highway Patrol, or FHP, is the state's enforcement authority in highway safety. FHP Drug Recognition Experts, or D R E's, serve as subject matter experts receiving over 100 hours of extensive, specialized training to identify a variety of drug-induced driver impairments. To become a D R E, a law enforcement officer must first complete two prerequisite courses, receive an endorsement from their local Assistant State Attorney, another D R E and their leadership, successfully complete the two-week D R E training program, complete a minimum of twelve field evaluations in the presence of an instructor, and pass both a written and practical exam.

D R E's are typically deployed in scenarios requiring an evaluation of a driver suspected of impairment caused by a narcotic. The D R E's' expert testimony often helps prosecutors secure convictions in cases involving impaired driving; specifically, when impairment results from the use of substances other than alcohol, including suspects under the influence of multiple impairing substances.

The FHP D R E program follows all protocols and examinations as directed by the International Association of Chiefs of Police.

The FHP has 65 of the 392 D R E's in Florida, representing 16.6% of all D R E's. Of these 65, 7 are Instructors. FHP has also set an aggressive goal to add 20 new D R E's to their ranks each year to eventually have 300 Troopers certified as D R E's. This would translate to approximately 1 in 5 Troopers, or 20%, credentialed as D R E's on Florida's roadways at any given time.

CRASH REPORTING

UPDATING FLORIDA'S CRASH REPORT FORM

To collect information on the number of marijuana-related traffic crashes in the state, the department released a crash report supplement in late 2017. This supplement requires law enforcement agencies, upon completion of their crash investigation, to submit positive drug test results to the department. The supplement has been adopted by all law enforcement agencies and provides positive drug test results on seven drug types based on recommendations from the National Highway Traffic Safety Administration. For each crash, the supplement is provided on drivers and non-motorists tested for drugs and provides space for up to four different drug results.

Since implementation of the crash report supplement, the department has worked directly with more than 300 law enforcement agencies across the state to update the crash report form and its submission process to track marijuana-related traffic crash information.

DATA AND BASELINE INFORMATION

In accordance with <u>section 381.989</u>, Florida Statutes, the department established baseline data and provides reports annually on the number of marijuana-related traffic crashes occurring in the state.

The table below depicts general impaired driving crash information reported by the department in the <u>Traffic Crash Facts Annual Reports</u>.

Drug & Alcohol	Confi	rmed C	rashe	s and	Fatalit	ies by	Year

The information in the following tables depicts data submitted to the department as of January 4, 2022, from the crash report supplements, but is considered preliminary and may change as updates become available.

The chart below depicts the number of times a type of drug was reported in a crash during the respective year. Please note that one crash can have multiple drugs reported. Please also note that more than one driver or non-motorist involved in a single crash may be tested for drugs. For example, if a crash involves two or more vehicles, all the drivers may be tested for drugs.

Of the drug types reported, Marijuana was the most prevalent category, followed by Other Controlled Substance, Amphetamine, Cocaine and Opiate.

Individuals age 25-29 were the most reported age group in crashes with 552 drug-related crashes and 953 positive drug test results reported to the department. The most prevalent drug in this age group was Marijuana followed by Other Controlled Substance.

Marijuana is the most prevalent drug in teenagers and young adults, ages 10 through 24, involved in crashes. Marijuana prevalence begins to decrease at 25 years of age or older.

The Other Controlled Substance drug type includes prescription drugs such as benzodiazepines. The Other Drug type includes non-prescription drugs such as allergy medication or those without a specific category for the test result. Unknown is reported when the test produces an unknown result.

The table below depicts the prevalence of drugs by type and age group of persons involved in drug-related crashes.

The following table depicts the types of drugs and the total crashes in which that drug was reported. As there can be up to four drug results reported in drivers and non-motorists involved in a crash, a single crash may be counted in more than one drug type. For example, this table shows 485 crashes in 2018 in which Marijuana was reported. However, the Prevalence of Drugs by Type by Year table on page 4 shows Marijuana was reported 496 times, meaning more than one person in a single crash tested positive for Marijuana.
