

IMPAIRED DRIVING ANNUAL REPORT

January 31, 2023

EXECUTIVE SUMMARY

Note: For the purposes of this report, the Florida Department of Highway Safety and Motor Vehicles will be referred to as the department, or as FLHSMV.

Pursuant to [section 381.989](#) of Florida Statutes, FLHSMV maintains statewide impaired driving education campaigns to raise awareness and prevent marijuana-related and cannabis-related impaired driving. Beginning in the year 2017, and annually thereafter, the statute requires the department to capture data on the number of marijuana-related citations, crashes and arrests, and to report this data on January 31st of each year to the Governor, the President of the Senate, and the Speaker of the House of Representatives.

To assist in capturing the data on marijuana-related and other drug impairment crashes, the department implemented a supplement to Florida's Traffic Crash report. The supplement has been adopted by all law enforcement agencies in the state and captures seven drug types based on the National Highway Traffic Safety Administration's recommendations for drug impairment. This supplement is required to be provided with all crash reports indicating a person was impaired by drugs at the time of the crash.

The department trains a number of Florida Highway Patrol Troopers as Drug Recognition Experts, also known as D R E's. D R E's are highly-trained law enforcement officers with expert knowledge in an extensive range of driver impairments and their associated signs and symptoms. D R E's are dispatched to assist investigations and obtain convictions in cases involving impaired driving.

IMPAIRED DRIVING CAMPAIGNS

Each year, FLHSMV promotes public safety on Florida's roadways and educates residents and visitors to the state on the dangers of impaired driving through ongoing public awareness campaigns.

In March 2022, FLHSMV launched the annual "Never Drive Impaired" campaign, focusing on the message "Impairment is No Illusion" to drive home the point that impairment's consequences are real, and minimal amounts of alcohol or drugs can alter judgment and negatively affect cognitive abilities.

FLHSMV targeted motorists ages 18 to 39, and in March saw nearly 50,000 page views of its Impaired Driving web page, including an uptick in the age 24 to 35 demographic.

FLHSMV achieved nearly 37 million total impressions and over 2 million engagements through paid media such as Google, YouTube, Facebook, Instagram, Snapchat, Spotify, Pandora, and Gas Station TV, and through earned media across social media channels. The campaign-launch press release was viewed by over 11,000 individuals, leading to 24 broadcast TV and radio news segments and 16 online and print news stories. Total estimated reach of the 40 media pieces was 1.5 million. During Spring Break, over 49,000 clicks were made to FLHSMV's Spring Break campaign page.

March has one of the highest crash rates of the year and includes events such as St. Patrick's Day, Spring Break and Daytona Bike Week. The Florida Highway Patrol, or FHP, had a presence at Bike Week through FLHSMV's partnership with the Daytona International Speedway. This partnership and presence at Bike Week helped expand FLHSMV's footprint in an additional annual event with a large target audience.

FLHSMV developed messaging and graphics and provided marketing materials to FHP Public Affairs Officers, public safety partners, and other stakeholders throughout the state. FHP participated in 49 events during March, in direct correlation to the "Never Drive Impaired" campaign.

The "Never Drive Impaired" message continued throughout the 2022 calendar year, including the two-month "Safe Summer Travel" campaign, and during six holiday weeks in November and December, when FLHSMV launched its "Safe Holiday Travel" campaign, focusing on the message "Safety is Always in Season."

FLORIDA HIGHWAY PATROL DRUG RECOGNITION EXPERT PROGRAM

A Drug Recognition Expert, also known as a D R E, is an officer who has received specialized training and has been certified by the International Association of Chiefs of Police to evaluate suspects and determine if a subject is impaired, what drug categories are causing the impairment, and if a medical condition is causing the impairment.

Because of the complexity and technical aspects of the D R E training, not all law enforcement officers may be suited for the training. In Florida, an officer must have at least three years of law enforcement experience, must have completed the 24-hour National Highway Traffic Safety Administration Standardized Field Sobriety Testing course, as well as the 16-hour Advanced Roadside Impaired Driving Enforcement course. An application must be completed which includes proof of completion of the two prerequisite courses mentioned above, the endorsement of their local Assistant State Attorney, a recommendation of two other D R E's, a recommendation from their department chief or designee, and copies of two D U I case reports the applicant has completed within the last year. This application is reviewed by the State D R E Coordinator at the Institute of Police Technology and Management.

In order to maintain certification, D R E's must conduct a minimum of four evaluations within the two years, submit a rolling log and current resume, and attend eight hours of recertification training.

FHP currently has 55 Certified Drug Recognition Experts. Twelve of the 55 certified are D R E Instructors, three of which have been to the D R E Course Manager's Training. FHP provides a pay additive to those members who achieve and maintain their certification. The International Association of Chiefs of Police reported a total of 369 certified D R E officers in Florida as of January 1, 2023.

FHP is committed to the success of the program and recognizes the need for more certified officers, as well as the benefits of the highly-trained Troopers. We are scheduling Standardized Field Sobriety Testing and Advanced Roadside Impaired Driving Enforcement courses for our members to prepare them for D R E Training, as well as to provide our Troopers with the skills to more effectively combat Impaired Driving. The locations and number of D R E's are listed in the following table:

Current Locations and Numbers of D R E's		
Troop A	Number of D R E's	7 Active
Troop B	Number of D R E's	8 Active
Troop C	Number of D R E's	9 Active

CRASH REPORTING DATA AND BASELINE INFORMATION

In accordance with [section 381.989](#) of Florida Statutes, the department established baseline data and provides reports annually on the number of marijuana-related traffic crashes occurring in the state.

The table below depicts general impaired driving crash information as reported by the department in the [Traffic Crash Facts Annual Reports](#).

Drug & Alcohol Confirmed Crashes and Fatalities by Year										
Alcohol Confirmed Crashes	Year 2017	5,125	Year 2018	5,106	Year 2019	4,984	Year 2020	4,554	Year 2021	5,111
Alcohol Confirmed Fatalities	Year 2017	374	Year 2018	372	Year 2019	378	Year 2020	384	Year 2021	407

Drug and Alcohol Confirmed Crashes	Year 2017	355	Year 2018	386	Year 2019	420	Year 2020	380	Year 2021	414
Drug and Alcohol Confirmed Fatalities	Year 2017	274	Year 2018	300	Year 2019	342	Year 2020	328	Year 2021	383

The information in the following tables depicts data submitted to the department as of January 4, 2023, from the crash report supplements, but is considered preliminary and may change as updates become available.

The chart below depicts the number of times a type of drug was reported in a crash during the respective year. Please note that one crash can have multiple drugs reported. Please also note that more than one driver or non-motorist involved in a single crash may be tested for drugs. For example, if a crash involves two or more vehicles, all the drivers may be tested for drugs.

Prevalence of Drugs by Type by Year										
Amphetamine	Year 2018	189	Year 2019	231	Year 2020	243	Year 2021	246	Year 2022	125

Unknown	Year 2018	11	Year 2019	11	Year 2020	9	Year 2021	5	Year 2022	4

Of the drug types reported, Marijuana was the most prevalent category, followed by Other Controlled Substance, Amphetamine, Cocaine and Opiate.

Individuals aged 25-29 were the most reported age group in crashes with 725 drug-related crashes and 1,239 positive drug test results reported to the department. The most prevalent drug in this age group was Marijuana followed by Other Controlled Substance.

Marijuana is the most prevalent drug in teenagers and young adults, ages 10 through 24, involved in crashes. Marijuana prevalence begins to decrease at 25 years of age and older.

The Other Controlled Substance drug type includes prescription drugs such as benzodiazepines. The Other Drug type includes non-prescription drugs such as allergy medication or those without a specific category for the test result. Unknown is reported when the test produces an unknown result.

The table below depicts the prevalence of drugs by type and age group of persons involved in drug-related crashes.

The following table depicts the types of drugs and the total crashes in which that drug was reported. As there can be up to four drug results reported in drivers and non-motorists involved in a crash, a single crash may be counted in more than one drug type. For example, this table shows 518 crashes in 2019 in which Marijuana was reported. However, the Prevalence of Drugs by Type by Year table on page 5 shows Marijuana was reported 537 times, meaning more than one person in a single crash tested positive for Marijuana.

Prevalence of Drugs in Crashes
