- Issue 35 Not Sufficient Backlog for Sprint Planning The team continues to work on completing two sprints worth of stories refined prior to sprint planning.
- He mentioned there are also late training tasks related to training material development for MyDMV Portal and Title and Registration. The Learning and Development Office has begun training material preparation using the Stage environment.
- Mr. Weldon stated for Team A (Title and Registration) SEU continued to test 17 remaining Milestone I stories. The team is trending behind on refinement, development, and testing for Milestone J. The team has one story remaining to refine and seven stories left to develop for Milestone K. There are 106 stories remaining for refinement, 162 for development, and 224 to test for Milestone L. The team just began refinement for Milestone M. The team completed Sprint 49 today with a demo and retro. The focus for the team continued to be development of the change requests for NMVTIS for Milestone J, and development for personalized plate, specialty plate voucher, and express renewal for Milestone L.
- Mr. Weldon stated Team B (MV Globals) continued to work on completing Milestone K with one story remaining to develop and test. The team has 45 stories to refine, 47 to develop, and 61 to test for Milestone L. The team began refinement for Milestone M. The team continued to focus on the motor vehicle history inquiry screens for Milestone K, the motor vehicle records request for Milestone M, and refining fleet maintenance and the stop queue.
- Scott Tomaszewski stated for the IFTA/IRP team, Milestone N is scheduled to be complete in April 2023. The focus is on technical work supporting global changes needed by Phase II applications with the highest priority being addressing interface bugs reported by the vendor. The vendor is tracking to complete all their configuration changes when the audit module is completed April 21, 2023. The development stoplight is yellow. Developers will carry over the research work needed to complete designs of the refund process, confirming the legacy processes that will still function after go-live. Currently, the vendor has three registered urgent bugs being worked, and eight resolved urgent bugs being validated. The testing stoplight is red as IRP Distribution End-to-End functional testing will carry over four blocked testing stories into the next sprint, all of which are related to data that meets the test scenario requirements.
