## **MOTORIST MODERNIZATION ADVISORY BOARD**

### **Monthly Meeting Minutes**

**Kirkman Building Conference Room B-203**

**April 11, 2017**

**1:00 p.m. to 3:00 p.m.**

#### **WELCOME AND INTRODUCTIONS**

- The meeting was called to order at 1:00 pm. Mr. Samuel began the meeting with the *Welcome and Introductions*. He proceeded with the roll call of the Board Members.

Advisory Board Members present included:

- Beth Allman
  - Carl Forney
  - Kelley Scott
  - Deb Roby
  - April Edwards (via phone)
  - Ed Broyles (not present)
  - Linda Fugate (not present)
- Other DHSMV members present included: Terrence Samuel, Kristin Green, Koral Griggs, Judy Johnson, Aundrea Andrades, Jessica Espinoza, Cathy Thomas, Cheryl Dent, Sonia Nelson, Janis Timmons, Scott Tomaszewski and Kelly Shannon.
  - Visitors included: Alyene Calvo from Ernst & Young, Joe Weldon from Accenture and Selma Sauls from Auto Data Direct, Inc.

#### **REVIEW AND APPROVAL OF THE LAST MEETING MINUTES FROM MARCH 14, 2017**

- Ms. Green reviewed the meeting minutes from March 14, 2017. There were no changes, corrections or revisions from members. A motion to approve the March 14, 2017 minutes was unanimously accepted by the Board Members.

#### **IV&V UPDATE**

- Ms. Calvo indicated that there are no new IV&V deficiencies, per the February Monthly Assessment Report. The schedule performance index is 1.00. The overall program risk state is green. No additional facets were evaluated. Ms. Calvo indicated that they will be reviewing the Controls facet for the April report and the Technical Infrastructure facet in the report that will come out in June. The Program is within established performance thresholds and control parameters.

#### **STAKEHOLDER OUTREACH UPDATE**

- Mr. Samuel and team members will be traveling throughout South and Central Florida to visit multiple Tax Collector offices in a couple weeks. They will be providing updates and providing a demonstration regarding the DL Issuance system and the Motorist Modernization project thus

far. They will be obtaining feedback and discussing ideas for efficiencies in the new motor vehicle system.

- Mr. Samuel attended the Tax Collector Quarterly Board Meeting held on March 30, 2017. Mr. Samuel provided an update on the program to attendees. The Tax Collectors had very few questions and indicated they are happy with the progress that has been made to date.
- There is some anticipated travel being planned to attend the IT Coalition Spring Meeting in Lakeland as well as the Tax Collector Spring Conference in the early weeks of May.

#### **POLICY AND DECISION REVIEW**

- POR31 – Ms. Espinoza indicated that there was not an update for this item at this time regarding the express shipping process. Ms. Andrades and her team along with Mr. Collins are trying to determine what express service options are available and the pricing for each and get back with their findings at the next Advisory Board Meeting.
- DL26 – Ms. Espinoza indicated that DL26 is for the check validation hardware and services that we have been working on with Bank of America for pricing information. We have received some new quotes from Alyssa Hoban and Steve Burch and will be presenting these at our next Advisory Board Meeting in a formal document.
- REN07 – Ms. Johnson indicated that they had another meeting with Novitex and will have an additional meeting to discuss the quotes received. Changes were made regarding some of the services so we will be sending them additional information and revisions for an updated quote.
- REN08 – Ms. Johnson stated that this is an agreement that was made to allow the Tax Collectors to provide their URL for their website so that it can be printed on the email reminders. It was decided that this field would be added to the TC Maintenance Screen for them to maintain. The renewal team raised concern with this decision because we would have no control over what was entered however, it would be listed on an email being sent by the department. The team thinks that this field should be maintained by the department. This decision is still being determined.

#### **FINANCIAL REVIEW**

- Ms. Timmons reviewed the figures for the March 2017 Spend Plan document. The program is currently on track with the deliverables. We have an outstanding contract amendment that is in process and hope to have executed this week. One additional deliverable will be added to the current fiscal year and will be completed by June 2017 - \$50,000 will be added to our existing contract. We have a Budget Amendment being processed and are anticipating approval for this within the next few days. This will allow OMM to move dollars from contracted services to OCO to cover some training, travel and a few other expenses. Everything else remains on track.

#### **CHANGE REQUEST REVIEWS**

- Ms. Green indicated that there were two change requests. One that has been approved since the last meeting and one that has been sent to the Advisory Board for recommendation before we take it to ESC on April 27, 2017. The Change Requests are as follows:
- CR49 – The purpose of this change request is to realign the policy and procedure task in the Integrated Master Schedule (IMS). The task was originally added to the schedule as a placeholder with full understanding that it would be elaborated as the approach was solidified. At this time, it is requested that the current task be re-aligned to reflect the activity and schedule of the DL Issuance Policies and Procedures working group. Once the ESC has approved

the schedule for remaining Phase I teams, a new, Critical-level change request will be submitted to add associated tasks in the IMS. This Change Request was approved on March 30, 2017 and fell within Mr. Samuel's authority and we have already made the schedule change.

- CR50 – The purpose of this Change Request is to align two separate sets of dates within the MM Phase I Integrated Master Schedule (IMS):
  - 1) EDI Dependencies
  - 2) LDO Training Plan construction and review dates for the main MM Phase I go-live effort.

The justification for moving these items within the IMS is to reflect input from the EDI project team as well as refinement of the training and development activities based on discussions with LDO Leadership. No direct impact to Motorist Modernization Phase I budget. This work effort will be performed by resources that are currently engaged in the program. Ms. Green requested a motion for approval and Advisory Board members approved it and now we will present it to the ESC Board Members on April 27, 2017 for approval and execution.

#### **PROJECT UPDATE**

- Motorist Maintenance – Mr. Tomaszewski indicated that the team has completed work on 119 stories for Milestone B/C on March 30, 2017. The team is currently in Milestone D which ends on August 30, 2017. This milestone addresses the Disposition user stories that will be completed in this milestone to accommodate the Citation Processing testing needs. Many of the Motorist Maintenance Developers have moved on to support Financial Responsibility development. The team is currently in Sprint 1 of 6 in milestone D. This Sprint ends on April 19, 2017. For this Sprint, the team committed to 2 stories planned for completion by the end of this Sprint. Four additional stories were approved to allow for testers to work on the test case review/review and test data creation tasks.
- Financial Responsibility – Mr. Tomaszewski states that on March 30, 2017, the team started Milestone D, which ends on August 30, 2017. Included in this Milestone is the Insurance Data Exchange stories and the Sanctions creation work to satisfy the approved Change Request 48. The team is currently in Sprint 1 of 6 in Milestone D. This Sprint ends on April 19, 2017. There are a total of 19 stories planned for completion by the end of this Sprint. The team's top priorities are to mitigate challenges faced by developers converting stores procedures to the ORION data model and make ready for test user stories.
- Renewal Notification - Ms. Nelson stated that the team is currently in Milestone B, which ends on April 18, 2017. Included in this Milestone are MH Vendor file and Parking Permit Vendor file attributes. There are no new risks, issues or change requests at this time.
- CDLIS/Citation Processing – Ms. Nelson's team has engaged in development tasks for Sprint 8 of Milestone B. The Sprint began on April 5, 2017 and ends on April 25, 2017. The team is working to complete Disposition, Create a Disqualification (Felony Possession) and generate the Disqualification Letter. There are no reported risks for the current period. The team is working to complete the Citation Data Tier stories for Change Request 46. There is a new Change Request for CDLIS Data Tier which will be presented to the ESC on April 27, 2017.
- MyDMVPortal – The team is currently in Milestone D which ends on August 28, 2017. The team is currently in the first of seven Sprints of Milestone D. At this time, development estimates are within capacity and testing estimates are not within capacity for this Sprint. The team's top priorities are Development and Updating Test cases. There are a total of 120 stories planned for

completion by the end of this Milestone. There are no newly reported risks or Change Requests for this current period.

- DL Issuance – Mr. Weldon indicated that the team is currently in Milestone C which ends on May 10, 2017. Included in this Milestone is the functionality to complete an Original ID Issuance as well as base cashiering functionality. Due to dependencies on the Card Print Project, we will not include stories/functionality related to print preview or printing. The team is working on Sprint 11, the last Sprint before the Hip Sprint for this Milestone which ends on April 26, 2017. This Sprint includes 40 stories.
- The Policy and Procedures Working Group is continuing their meetings on a weekly basis via conference calls. The team met last week during our Sprint 10 review. An onsite visit is scheduled for May 9 through May 11, 2017. The team is currently on schedule for their second assignment which is due May 5, 2017. There are no specific risks reported for the current period. Two issues remain open:
  - Issue 47 – Currently 6 Motor Voter stories in the current Sprint are on hold pending direction on how to handle impact of SB72. Need a decision/direction by the end of the Sprint.
  - The team is looking at pulling in additional stories.

There are no Change Requests or action items to report for the current period.

- Mr. Samuel wanted to share with everyone that we are constantly looking for ways to improve our process and efficiency. We have several projects coming up that are going to impact some of the teams testing resources as there are only a limited amount of testers available. We have projects on the operational side, EDI and Test Data Management. Mr. Samuel has met with Mr. Hutchinson and Mr. Marsey to determine how we could become more efficient with software development. We remain open to various options that may come available to us to maintain efficiency.

#### **Q&A**

- There were no questions or concerns from members present.

#### **ADJOURNMENT**

- Mr. Samuel requested a motion to adjourn the meeting and the meeting was adjourned at approximately 1:35 p.m.
- The next Advisory Board Meeting is scheduled for *Tuesday, May 9, 2017*.

*Note: Handouts at this meeting included:*

*Consolidated in a meeting packet and emailed to members:*

Change Request Form – Agile Project

**General Information**

Project Name	Motorist Modernization Phase I – CDLIS
Change Requested By	Sonia Nelson – Project Manager
Product Owner	Tod Browning
Date Requested	April 4, 2017

**Change Request #**

51

**Change Request Information** (completed by the requestor)

**Description:**

The purpose of this Change Request is to address the CDLIS data tier requirements to integrate BizTalk 2013 with the following processes:

- VLS (Verification of Lawful Status)
- AAMVACORE
  - PDPS (Problem Driver Pointer System)
- Motorist Services

These are backend changes required to upgrade existing stored procedures connecting BizTalk to communicate with the Oracle database, AAMVACORE, CDLIS and Motorist Services. This CR will detail the necessary work effort to modify stored procedures and service endpoints. The team will create stories in blueprint to add the data tier work effort to the CDLIS backlog.

Classification Critical : ☒ Medium : ☐

*Due to the level of classification (Level III) and potential impact to the scope, schedule, and/or budget, this change request must be reviewed by the Change Control Board and approved by the Executive Steering Committee in accordance with the MM Phase I Program Management Plan.*

**Business Need / Justification** (completed by the requestor)

Description: (Please include # of systems impacted, frequency of occurrence in production, volume of customers/users impacted, ROI, benefits, etc.)

This change request is required to connect CDLIS, Motorist Services, VLS, and PDPS to the new database and to convert the existing code to .NET.

The following applications will be impacted:

- VLS
- AAMVACORE
  - PDPS
- Motorist Services

**Impact Analysis** (completed by ISA)

**Specific Requirements Definition:** (specify whether refactoring / re-work is required)

**Impact on Schedule:** (specify whether modifications to the program's integrated master schedule (IMS) are required, which include addition/removal of sprints, addition/removal/modification of milestones, etc.)

The following changes to the CDLIS/Citation Processing Development order are necessary to include the Data tier work which is required to implement and complete the remaining CDLIS stories:

- 1) Add CLIS Data Tier Stories to Milestone B & C
- 2) Moved Commercial Disqualification to Milestone C
- 3) Moved all CDLIS Updates to Milestone D
- 4) Moved the following Stories from Milestone D to Milestone C
  - a. DUI Revocation Process
  - b. HTO Revocation Process
  - c. Point Suspension Process
  - d. Mandatory Revocation Process

Citation Processing stories have been moved from Milestone D to Milestone C to mitigate the risk that the CDLIS data tier work may not be completed in a single Milestone, which would impact subsequent CDLIS development. (Changes are highlighted in **blue**)

Based on Blueprint estimates for the remaining CDLIS/CP stories, the team can maintain our current schedule and absorb the additional hours to implement the Data Tier stories because, CDLIS/CP started earlier than initially planned, completing 7 Sprints (844 hours).

NO additional scope can be added without adjusting the date or adding more resources to make the AAMVA testing schedule and project end date.

<b>Change Request #</b>	<b>53</b>
Change Request Information (completed by the requestor)	
<p>Description: This CR is to move one Data Tier user story from Milestone D to Milestone E, to align with the Motorist Maintenance User Interface that will be updated for Financial Responsibility functionality.</p> <p>(1) FR 26907 FR#3 Create Judgement Sanctions – Data tier story planned to be completed in Milestone D needs to be moved into Milestone E to be developed in conjunction with FR24519 FR/Judgements Screen – Data tier: Add Judgement. The creation of a Judgement Sanction is initiated through the Motorist Maintenance Application.</p>	
<p>Classification Critical : <input type="checkbox"/> Medium : <input checked="" type="checkbox"/></p>	
<p><i>Due to the level of classification (Level III) and isolated impact to the schedule (not on the critical path), minor scope change(s), and/or minimal impact to budget, this change request may be approved by the Program Director in accordance with the MM Phase I Program Management Plan.</i></p>	

Business Need / Justification (completed by the requestor)
<p>Description: To complete sprint testing and receive final Product Owner sign off of this story, this data tier story needs to be completed in conjunction with related data tier Motor Maintenance story scheduled for Milestone E.</p>

Impact Analysis (completed by ISA)
<p><b>Specific Requirements Definition:</b> This change would require that the FR3 Create Judgement Sanctions – Data Tier work be developed and tested when the FR/ Judgements Screen – Data Tier Add Judgement story is completed in Milestone E.</p>
<p>Completed by: Scott Tomaszewski</p>

**Office of Motorist Modernization  
Change Request Form – Agile Project**

Move stories to reflect the proper milestone in which development should be completed and will not impact milestone dates. All other Phase I project teams have confirmed that there are no negative impacts to their projects.

<b>Total Effort</b>	<b>0</b>	<b>3</b>	<b>0</b>	<b>16</b>	<b>13</b>	<b>32</b>

**Milestone E: Due 1/3/18 – 5 Sprints + 12-day HIP**

FR 26907	FR#3 Create Judgement Sanctions – Data tier	Move to Milestone D	32 hrs
----------	---	---------------------	--------

Additional stories previously moved to Milestone E (via approved CR 48):

FR24508	FR / Search Company Screen - Data Tier: Search Company	Move to Milestone E	8 hrs.
FR24512	FR / Search Company Screen - Data Tier: Update/Add	Move to Milestone E	8 hrs.
FR24519	FR / Judgments Screen - Data Tier: Add Judgment	Move to Milestone E	24 hrs.
FR24525	FR / FR Reports Screen - Data Tier: Display Logs and Files	Move to Milestone E	8 hrs.
FR24527	FR / FR Reports Screen - Data Tier: Display Sanction Error Queue	Move to Milestone E	8 hrs.
FR24522	FR / FR Crash Screen - Data Tier: Add Crash Report	Move to Milestone E	8 hrs.
FR24515	FR / Add Insurance Policy - Data Tier: Add/Update	Move to Milestone E	24 hrs.
FR28432	FR / FR Reports Screen - Data Tier: Update Sanction Error Queue	Move to Milestone E	8 hrs.
FR24523	FR / FR Crash Screen - Data Tier: Edit/Delete Crash Report	Move to Milestone E	24 hrs.
FR24516	FR / Insurance Policy Details - Data Tier: Display	Move to Milestone E	8 hrs.

There are 5 development Sprints included in milestone E, which with 9 assigned developers equals a projected capacity of **2,894** hours for the milestone (3294 developer hours for the milestone minus 400 hours of capacity for the fall holidays). For Milestone E, the:

- Planned work of 569 hours +
- Stories approved to be completed in Milestone E from CR 48 (120 hours) +
- Proposed hours within this CR (32 hrs. total) =
- A total of **761** work hours.

The team has also considered, as a contingency, estimates that may be modified from original or epics needing further refinement. The outcome of this analysis provided an estimate that was still within the team's projected capacity for the milestone.

General Information	
Project Name	Motorist Modernization Phase I – MYDMV Portal
Change Requested By	Robert Kynoch, Andrea Andrades
Product Owner	Deepa Vasudevan
Date Requested	January 19, 2017

<b>Change Request #</b>	<b>54</b>
Change Request Information (completed by the requestor)	
<p><b>Description:</b> Currently, DHSMV has the ability to waive fees for duplicate registrations (Vessel, Vehicle), printing electronic titles (Vessel, Vehicle), and replacement of DLs, CDLs, CLPs and IDs transactions in the field offices. On January 19, 2017, the ESC discussed a recommendation by Robert Kynoch to implement the Governor's Emergency Declaration fee override within MyDMV Portal for the previously mentioned transactions.</p>	
<p>Classification Critical : <input checked="" type="checkbox"/> Medium : <input type="checkbox"/></p>	
<p><i>Due to the level of classification (Level III) and potential impact to the scope, schedule, and/or budget, this change request must be reviewed by the Change Control Board and approved by the Executive Steering Committee in accordance with the MM Phase I Program Management Plan.</i></p>	

Business Need / Justification (completed by the requestor)
<p><b>Description:</b> Counties approved for Governor's Emergency Declaration will be set in a table within Orion. Both Orion and MyDMV will read the table to determine which residents are eligible for no fee replacements by setting the no fee reason code. MyDMV will allow no fee issuances for certain transactions when the county the customer lives in is in a state of disaster. MyDMV will check the indicators on a table and pass a flag to the fee calculator, which will determine and set a no fee reason for that transaction and no convenience fee.</p>

Impact Analysis (completed by ISA)
<p><b>Specific Requirements Definition:</b> This Change Request will require requirement updates and re-work for reading a new table to determine when to return no fee reason code for Orion and MyDMV Portal.</p> <p>MyDMV requirements for upcoming DL, CDL, CLP transactions will be modified to determine when to pass the new no fee reason and to calculate fees accordingly. Requirements for the Motor Vehicle transactions will be modified to determine when to pass the new no fee reason and to calculate fees accordingly.</p> <p>New functionality in Orion to maintain the table that will hold the counties set by the Governor, which will state the event - TA, beginning and end date for the disaster period.</p> <p>Completed by: Aundrea Andrades</p>

**Impact on Schedule:** No changes to schedule. These changes will be incorporated in the team's backlog for work in upcoming Milestone stories. Work is required from both the MyDMV Portal and DL Issuance development teams in Milestone D. Both teams have verified having adequate capacity (estimated) during Milestone D to complete this request.

**Alternatives to the Requested Change:** DL currently offers the no fee option, but would not implement the table-driven county eligibility. MyDMV would not offer the no fee replacements online and direct them to the office.

General Information	
Agile Project Name	Motorist Modernization Phase I – DL Issuance
Change Request Title	Add DL Milestone D Placeholder Stories
Change Requested By	Joe Weldon
Product Owner	Dana Olvera
Date Requested	05/09/2017

<b>Change Request #</b>	<b>55</b>
<input checked="" type="checkbox"/> New Request	<input type="checkbox"/> Resubmitted / Amended Request

Change Request Information (completed by the requestor)
<b>Description of Change:</b> The purpose of this change request is to create stories to allow developers to functional test in Alpha and testers to test screens developed for Original ID for Renewal and Replacement ID transactions as well as the FDLE Letter transaction in MS Test. This will allow developers to confirm that the screens function correctly for these additional transactions and testers regression test that the screen performs as well.
<b>Classification:</b> Critical <input checked="" type="checkbox"/>
<i>Due to the level of classification (Level III) and potential impact to the scope, schedule (on the critical path, milestone impact, and/or &gt;10 business days/81 hours), and/or budget (&gt;\$500, increase to overall program budget), this change request must be reviewed by the Change Control Board and approved by the Executive Steering Committee in accordance with the MM Phase I Program Management Plan.</i>
<b>Change Request Type:</b> <input type="checkbox"/> New (Unplanned/Missed) Work Effort <input type="checkbox"/> Re-work <input checked="" type="checkbox"/> New (Expanded) Work Effort <input type="checkbox"/> Removal/Archival

Business Need / Justification (completed by the requestor)
<b>Description:</b> This change is necessary because during requirement refinement, the DL Issuance team removed the existing placeholder stories. The team needs a story/product back item to validate existing screens function as expected for transactions that are being implemented as part of Milestone D.

# Office of Motorist Modernization Change Request Form – Agile Project

## Business Need / Justification (completed by the requestor)

Description: Currently, CDLIS and PDPS offline verification is performed manually by field personnel and there's no way for DHSMV to ensure that this verification is actually taking place. By automating this process, we can ensure that the verification is being performed.

The work flow below shows the updated flow for AAMVA offline verifications. The numbers in the flow steps below correspond to the Workflow column in the list of user stories under Specific Requirements Definition.

**Impact Analysis**

**Requirements Change Description:** This change would add/change the following user stories:

Name	System	User Story	Workflow
Calculate AAMVA Offline Verification Required Flags	MyDMV Portal	As a MyDMV Portal User, I need to determine when AAMVA offline verifications are required so that they can be completed offline by the AOV System.	3
Insert into AAMVA Offline Working Table	MyDMV Portal	As a MyDMV Portal User, I need a record inserted into the AAMVA Offline Working table during an issuance whenever a required AAMVA check is unable to be performed so that it can be performed offline.	4
Calculate AAMVA Offline Verification Required Flags	DL Issuance	As an Examiner, I need to determine when AAMVA offline verifications are required so that they can be completed offline by the AOV System.	1
Insert into AAMVA Offline Working Table	DL Issuance	As an Examiner, I need a record inserted into the AAMVA Offline Working table during an issuance whenever a required AAMVA check is unable to be performed so that it can be performed offline.	2
Pull Pending AAMVA Verifications from Working Table	AAMVA Offline Verification (AOV)	As the AOV System, I need to retrieve transactions needing offline AAMVA verification so that the required verifications can be completed.	5
Pull Customer Record	AAMVA Offline Verification (AOV)	As the AOV System, I need to retrieve the customer record to see if they still need pending offline verification.	6
Delete from AAMVA Verification Working Table	AAMVA Offline Verification (AOV)	As the AOV System, I need to delete the SSA offline verification record after successful verification so that no additional attempts are made.	7
Perform SSA Inquiry	AAMVA Offline Verification (AOV)	As the AOV System, I need to perform SSA inquiries on transactions needing offline verification so that the required AAMVA checks can be performed.	8
Perform CDLIS Inquiry	AAMVA Offline Verification (AOV)	As the AOV System, I need to perform CDLIS inquiries on transactions needing offline verification so that the required AAMVA checks can be performed.	9

## Motorist Modernization Glossary

- Approved
  - Development and/or testing are approved to work on the story and plans to complete the tasks added in the sprint.
- Burndown
  - Sprint tracking tool that shows the total original estimated hours verses the remaining hours measured against the sprint timeline to graphically depict the progress of the team during the current sprint.
- Capacity
  - Calculation of the hours of available work by task type for a sprint. Typically calculated at 80% of the day or 6-hour work days per person.
- Committed
  - Development and testing can both be completed in the sprint based on the capacity each group commits and the level of effort for the associated stories.
  - Development stories completed in a previous sprint, which only require testing and the testers agree to testing the stories during the sprint.
- Completed Work
  - The hours of work completed on the task.
- Dev Status
  - Possible statuses –
    - Not Started
      - Development has not yet started.
    - Dev Started
      - Development has begun.
    - Dev Done
      - QA can start testing. The developers have already completed deployment to Alpha and the functional testing tasks are complete.
      - QA testing should not start before a story is marked Dev Done and SEU testing (excluding building test cases) should not start before a story is marked Ready to Test.
      - The developer who completed the functional testing is responsible for marking the story Dev Done.
    - Ready to Test
      - SEU can start testing. QA has already completed testing and the application has been deployed to Beta and verified.
    - Testing in Progress
    - Testing Blocked
    - Testing Complete

- Blocked Task
    - Task that is not yet assigned due to dependencies, or an assigned task that cannot be worked to completion due to dependencies, whether in development or testing. A blocked task is not necessarily an impediment.
      - Bug
        - Error in program code that causes it to produce an incorrect or unexpected result based on the requirement.
      - Impediment
        - An obstacle to development or testing task completion that cannot be resolved within a workgroup (Developers, Testers or Business Analysts) within a project task.
  - Done
    - The story or functionality has been developed and tested and received product owner sign off.
- Functionality/Stories
  - A high-level definition of a requirement, capturing the who, what and why in a simple, concise way. Business rules are linked to stories and a group of stories make up a functional area.
- Issues
  - A defined barrier or obstacle to project work, which is currently happening and may impact forward progress immediately or in the future. An issue can also be a risk, which cannot be managed through risk mitigation approach.
- Milestone
  - Defined period to complete a defined set of features or functionalities.
- Original Estimate
  - The original estimate in hours of work to complete the task.
- Remaining Work
  - The estimate in hours for the work remaining to complete the task.
- Risks
  - An uncertain future event, which may have a negative impact on the project should it occur.
- Sprint
  - Three-week Agile development cycle as defined by Motorist Modernization.
- Task
  - Unit of work.
