III. DEFINITIONS

A. **CIO** – Chief Information Officer. The Director of Information Systems Administration (ISA) serves as the department’s CIO.

B. **Governance** – Provides an integrated approach to the review, approval and prioritization of projects using an enterprise philosophy and ensuring compliance with the department’s Strategic Plan.

C. **Information Technology (IT)** – Use of technology for the storage, communication or processing of information. The technology typically includes computers, telecommunications, applications and other software. The information may include business data, voice, images, video, etc. Information Technology is often used to support business processes through IT services.

D. **ISA** – Information Systems Administration

E. **Services** – Means of delivering value to customers by facilitating outcomes customers want to achieve.

IV. POLICY

Information technology services are provided to assist members to efficiently and effectively accomplish the department’s mission and goals. The department will utilize IT best practices, which include an Information Security Program and a department-wide governance review process for new initiatives.

The Information System Administration will develop and maintain a procedure for requesting new or modifying information technology services. All proposed purchases of information technology hardware, software, services, and related IT components must be presented with proper justification to, and approved in writing by, the department’s CIO or designee prior to purchase.

V. ROLES AND RESPONSIBILITIES

A. The Information Systems Administration will maintain a procedure for requesting information technology services and act as the coordinator for the department’s governance process, which is headed by the department’s Executive Director.
B. The Enterprise Security Management Office is responsible for administration of the department’s Information Security Program. Requests for new software and network changes will be reviewed for compliance with the information security plan.

VI. PROCEDURES

For additional procedures regarding information technology and security, please see Procedures for Requesting Information Technology Services and the Information Security Policy Manual.
