

## **Private Rebuilt Motor Vehicle Inspection Training Requirements**

### **Private Rebuilt Vehicle Inspection Program (PRVIP) Inspectors**

Any person interested in becoming an authorized PRVIP Inspector to conduct rebuilt vehicle inspections at an authorized PRVIP Facility is required to complete the PRVIP Training provided at any of the Bureau of Dealer Services (BDS) Regional Offices throughout the State. To sign up for the training program the applicant must complete a fingerprint background check through an electronic FDLE provider and provide proof to the BDS Regional Office where the PRVIP business will be located for review and approval.

### **Initial (24) Hour Rebuilt Vehicle Inspection Training**

The student is required to attend the initial 24-hour training program that includes but is not limited to identification of motor vehicles and their component parts, rebuilt vehicle title transfers and documents, National Motor Vehicle Title Information System (NMVTIS), overview of the Memorandum of Understanding (MOU, and the Florida rebuilt vehicle statutes, policies, and procedures. A certificate of completion shall be provided upon completion of the course.

### **Continuing Education (4) Hour Rebuilt Vehicle Inspection Training**

Annually, each owner and Facility Inspector shall complete a PRVIP (4) hour training continuing education course provided by FLHSMV. The (4) hour Inspector continuing education course may be completed no more than (2) months prior to the end of the renewal period. The PRVIP Facility shall renew their authorization by September 30 each year.

The PRVIP (4) hour continuing education course shall provide a “refresher” on identification of motor vehicles and their component parts, Florida rebuilt vehicle title transfer and documents, NMVTIS, and related Florida Statutes, policies, and procedures. Additionally, the course shall provide an overview of any rebuilt inspection service concerns identified by FLHSMV through conducting onsite Facility Inspections for quality assurance and introduce any modifications to the rebuilt vehicle inspection program.
